(54) PLASMA DISPLAY DEVICE AND PLASMA DISPLAY DRIVING METHOD

(57)Abstract:

PROBLEM TO BE SOLVED: To appropriately perform display control in accordance with the signal format input signal.

SOLUTION: Either one of a TV signal or a graphic signal is inputted as the input signal. A signal format discrimination circuit 4 discriminates whether the signal format of the input signal is the TV signal or the graphic signal. A mode classification control signal generation part 5 decides drive sequence of a drive circuit 7 in accordance with the discriminated signal format, and controls the drive of the drive circuit 7 by this. Thus, a display panel 8 is driven in accordance with the signal format of the input signal and is displayed on this.
